You can use this stencil to

A square plot with dashed horizontal and vertical axes. The plot contains 20 points, each labeled with the number '2'. The points are distributed as follows:

- Top-right corner:** A cluster of 12 points. There is a horizontal row of 6 points near the top edge. Below this, there are two columns of 3 points each, and a single point centered between these two columns.
- Right edge:** Two points are located near the top-right corner, and one point is located near the middle of the right edge.
- Bottom-right corner:** A cluster of 6 points. There is a vertical column of 5 points near the right edge. To the left of this column, there are two points stacked vertically.
- Bottom edge:** Three points are located near the bottom-right corner, forming a horizontal row.
