The figure displays a scatter plot of 100 data points, each marked with a circle containing the number '1'. The points are distributed within a square frame defined by dashed lines. The distribution is highly non-uniform, with a dense cluster of points in the lower-left region and a sparse distribution in the upper-right region. The points form a shape that resembles a right-angled triangle, with the hypotenuse facing the upper-right corner. The overall pattern suggests a concentration of data points in one corner of the square, possibly indicating a specific trend or boundary in the data.
